

## Strapping Band PET and PP

### Technical Specification PET;

Width (mm)	Thickness (mm)	Bobin Size (mm)	Length Per Roll (Meter)	Weight Per Roll (kg)	Minimum Break Force (Nw)
12	0.6	406	2000 m	20	4000
15	0.6	406	1580 m	20	4500
15	0.8	406	1200 m	20	5000
19	0.8	406	950 m	20	6500
19	1.0	406	780 m	20	7000

### Description:

#### PET

The polyester strapping band- a product which can successfully replace the traditional steel tape. Good quality and resistance allows precise and safe packing of any materials and their fastening. Pet strapping's are made of highest quality polyester, which allows to fulfill an industrial packing norms, an automatic and manual packing of any loads. Polyester does not losses it's characteristic under a high temperature, UV influence or bad weather condition. Breaking strength of the PET strapping is similar to the steal band

#### PP

The polypropylene strapping band is inexpensive, good quality packaging material which allows precise and safe packing of any materials and their fastening. These kind of strapping bands successfully replace traditional steel bands without losing their durability and strength.
